

Instant Emails Not Being Sent

Author:
FusionBB

Created On: 28 Oct 2008 2:03 AM

This has been an issue with Instant Subscriptions in version 1.0 and has been resolved in version 2.0.

As a work around for 1.0, try the following:

» From the **Admin** area: (do all of the steps below. *This is also known as Rutto's 'Click it all' tactic ;)*)

o **Permissions** >> **Site** check the *Can subscribe to topics settings*

o **Permissions** >> **Permissions Time Stamp** check *Update settings*

o **Database** >> **Re-sync Data** >> **Permission Matrix**

» Save your changes.

If you have tried the above-mentioned recommendations, but the instant emails are still not going out as expected:

» There is one specific cron script for subscribed topics (This script sends the emails out.) Make sure that you have this script added to the management area.

o **To add this cron script, go to:**

Admin CP >> Cron Scheduler >> Add Cron Task

» Once there, fill in the information such as the name you want for your cron script, the settings for when you want the cron to run, and whether you want a log file or not.

» Under the Script to run: setting, click the drop-down menu and choose the *topic_subscriptions.php* option. Then click **Proceed**.

» Your newly-added cron will begin running as scheduled.

(Thanks to Geffro, Rutto, Ted_G, Dave, & FusionBB Developer Josh Pettit for the info about the cron script addition.)
